SITE FACT SHEET for Fox Point Park Phase II (DE-1011)

SITE DETAILS

Address:	Lighthouse Road, Wilmington, DE 19809 US
Tax Parcels:	0614700017
County:	New Castle
Watershed:	Shellpot Creek
Site Acreage:	44.62
AKA:	No AKAs present
Site Category:	HSCA
Cleanup Phase:	Long-Term Stewardship

SITE DESCRIPTION

The Fox Point Park Site is located along Lighthouse Road, Wilmington, Delaware. The Site is an approximate 5525-acre portion of a 1707-acre parcel known by New Castle County as tax parcel number 06-14700-017. The Site has been divided into four (4) parcels: A, B, C, and D for the purpose of environmental investigation and remediation.

Parcels A and B: Fox Point Park Phase I (DE-1001)

Parcels C and D: Fox Point Park Phase II (DE-1011)

The Fox Point Park Phase II Site (DE-1011) has been further divided into two (2) Operable Units (OUs).

Operable Unit-1 (OU-1): "Upland area" Approximately forty-five (45) acres in size and bounded on the east by the Delaware River and on the west by a railroad right-of-way and Route 495. The Site may be accessed by way of Lighthouse Road, which intersects with Edgemoor Road at the DuPont Edgemoor Plant.

Operable Unit-2 (OU-2): Located offshore of Fox Point Park in a tidal portion of the Delaware River in New Castle County, Delaware. Extends from the shoreline of the park to the western boundary of the federal navigation channel from river miles (RMs) 73.2 to 74.6. It covers approximately two hundred (200) acres of riverbed and includes Fox Point Cove at its northern end.

CURRENT STATUS

Operable Unit-1 (OU-1): Long-Term Stewardship

Operable Unit-2 (OU-2): Final Remedial Investigation (RI) Work Plan—April 8, 2019

SITE FACT SHEET for Fox Point Park Phase II (DE-1011)

In an agreement dated August 15, 1940, the Engineers Department of the United States Army granted the Pennsylvania Railroad permission to deposit excavated material from the channel of the Delaware River upon land belonging to the railroad. The Pennsylvania Railroad began filling in the property in the 1960s with industrial waste materials including slag, bricks, timbers, waste ingots, castings, and ash furnace dust, eventually raising the surface of the Site ~10 feet above the natural elevation. The State of Delaware acquired the property for New Castle County in 1975. New Castle County Parks & Recreation operated and maintained the park until it was transferred back to the State in 1990. In 1976, the City of Wilmington, with permission of the New Castle Department of Public Works, began applying sewage sludge from its treatment plant to the Site as a soil amendment in an effort to improve the vegetative cover. Records show that at 2,378 dry tons of sludge was applied to Parcel C and 9,670 dry tons to Parcel D.

SITE ENVIRONMENTAL INVESTIGATIONS AND ACTIONS

SITE CONTAMINANTS OF CONCERN (COCs)

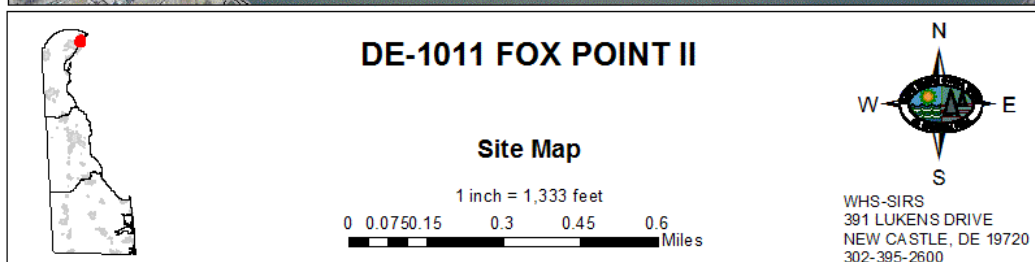

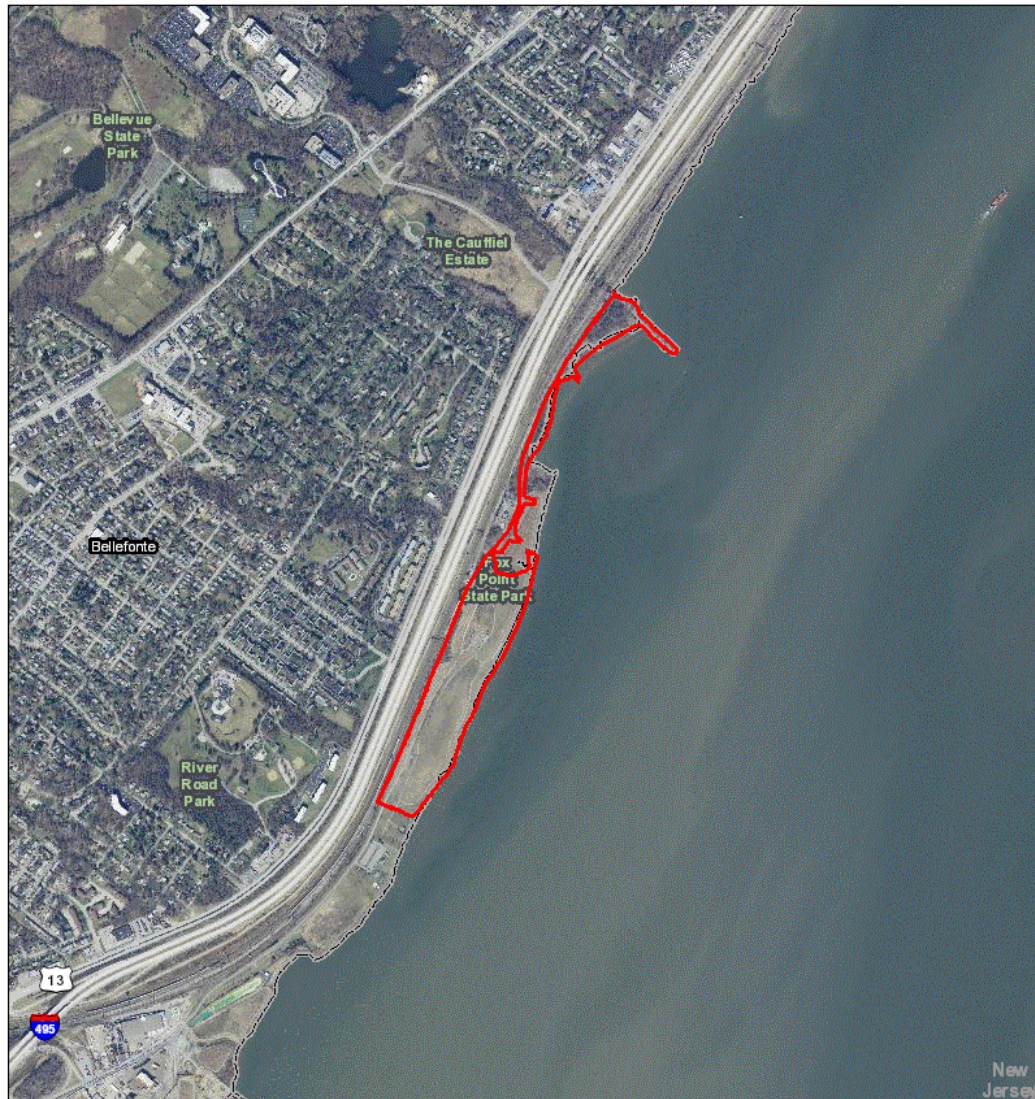

Contaminant Media Type Name	Contaminant Type Name	Contaminant Name
Sediment COCs	Metals	Arsenic, Lead
Sediment COCs	PCBs	Polychlorinated Biphenyls
Soil COCs	Metals	Arsenic, Lead
Soil COCs	PCBs	Polychlorinated Biphenyls
